The Unique Identification based on Biometrics, Aadhaar, is a major initiative of Government of India. The issuance of Unique Identity to 1.2 billion people is set to transform how Government and Enterprises across various verticals will identify and authenticate citizens and customers for various services. Already, several initiatives and pilot projects are being launched to address the issue of Financial Inclusion, MGNREGA, Public Distribution System, LPG distribution, KYC processes of banks etc.

As the world’s largest Identity Platform gains momentum, it will be opening up opportunities to integrate, re-engineer most of the Government and Private Sector service delivery initiatives by fully leveraging on the potential of Aadhaar, as single identity for residents of India. Managing such a large Identity Platform throws open a wide range of social and technological challenges and is likely to have a broader social impact and application.

We invite papers on following themes:-
- Privacy in Unique Identity environment
- Search techniques for biometric and image data
- Performance, high availability issues
- Storage architectures for large-scale data
- Integration challenges of Application Services
- Impact of education and health delivery
- Impact on banking, insurance and financial services
- Impact on poverty alleviation programs
- Impact on e-Governance service delivery
- Impact on Public Distribution System (PDS)
- Mobile Apps development for Aadhaar environment
